PRESS RELEASE

Solution to prevent diesel theft won the Tele2 IoT Challenge

Stockholm - Tele2 AB, (Tele2), (NASDAQ OMX Stockholm: TEL2 A and TEL2). Yesterday, Tele2 IoT presented the winners of Tele2 IoT Challenge: LPWA. The competition started in January, when Tele2 IoT decided to let companies experiment with its new LPWA network in Greater Gothenburg to come up with new innovations. The competition had 135 participants from 28 different countries and the winning solution will make it close to impossible for criminals to steal diesel – at least from those who own a GuardPuck.

Out of the incoming contributions, three winners were selected by the jury consisting of representatives from Tele2, Talkpool, PubNub, Microchip, Kerlink, IBM and Giesecke & Devrient. During yesterday's event, the jury announced the winners where Martin Johannesson, Johan Eliasson and Nils Ingelhag scooped first prize with the idea GuardPuck. The winners received products and services to a value of 150.000 SEK that will help them transform their idea into a working product.

The solution aims to prevent diesel theft from work vehicles, which is a common problem in Sweden with 8.000 reported thefts each year. By placing a "puck" on the vehicle that a customer wants to monitor, the puck will report if it notices an ongoing theft attempt. By gathering vibration and position data in the cloud, Martin says that future thefts also could be predicted and thereby help the police fight crimes. The LPWA technology makes it easier to counter jamming devices usually used by criminals. The puck transmits a signal with regular intervals and the lack of received signals to the server triggers an alarm and notifies the owner. It makes it impossible for thieves to jam the signal or even destroy the puck without an alarm being triggered.

During the award, Tele2 and partners also gave a 2nd prize to Marcus Carlberg from Etteplan with the idea Smart Farming that received products and services to a value of 75.000 SEK. The 3rd prize went to Leon Layas with the solution Advanced Lifering that received products and services to a value of 30.000 SEK.

Together with IBM, Tele2 also gave prizes in the category Smartest Startup Potential. The prizes went to Device Radio for their solution Garbage Collection and to Acando for their solution Air Quality Monitoring.

Stephen Bryant, CTO at Tele2 IoT, comments: "The often-quoted William Gibson line about the future being here, but not evenly distributed is becoming less and less true with the rapid advances and availability of technology. The future is here and competitors from many

continents leveraged LPWA, cloud technologies and open hardware to quickly create and demonstrate use cases needed in many societies around the world. I am thrilled to see that the winners of the competition could utilize the network to create real value for businesses and society. I wish the winners and all contestants the best of luck with their ideas in the future.”

About the network:

In November 2016, Tele2 IoT launched a new IoT network covering the Greater Gothenburg area in collaboration with Talkpool AB. It is an LPWA (Low Power Wide Area) network, in this case built on the LoRa technology ideally suited for applications that require lower bandwidth. The key advantages with the network are that IoT linked devices will be able to survive for several years on the same battery and that the hardware required has attractive pricing that opens up for new use cases that were not addressable with cellular devices. This makes the network perfect for measuring, monitoring or locating everything from products and buildings to people and animals.

TELE2 IS ONE OF EUROPE'S FASTEST GROWING TELECOM OPERATORS, ALWAYS PROVIDING CUSTOMERS WITH WHAT THEY NEED FOR LESS. We have 17 million customers in 9 countries. Tele2 offers mobile services, fixed broadband and telephony, data network services, content services and global IoT solutions. Ever since Jan Stenbeck founded the company in 1993, it has been a tough challenger to the former government monopolies and other established providers. Tele2 has been listed on the NASDAQ OMX Stockholm since 1996. In 2016, Tele2 had net sales of SEK 28 billion and reported an operating profit (EBITDA) of SEK 5.3 billion. For definitions of measures, please see the last pages of the Annual report 2016.
