PRESS RELEASE

Tele2 and foodora in a new collaboration on self-driving home deliveries

Today, Tele2 and foodora are taking a step towards the future of home deliveries. The Swedish telecom operator and the Q-commerce company have entered into a collaboration on a pilot for autonomous droids connected with 5G. The pilot means that today the droid Doora will take its historic first rolling step to carrying out home deliveries in Stockholm.

Internet of Things (IoT) is a concept now being applied to Swedish home deliveries. IoT means that machines, vehicles, household appliances, and other things are equipped with built-in connected sensors and processors. foodora predicts that the number of home deliveries will increase significantly in the future, which is why foodora is constantly working to find smoother and better solutions adapted to the needs of the future.

By connecting to Tele2's 5G network, the Doora droid can perceive its surroundings, communicate, and thus create a situation-adapted service - self-driving home deliveries. Doora has a camera that sends information via 5G in real time to foodora, which can track and trace the robot, while quickly sending data to and from Doora.

- It is exciting that we, together with the innovator foodora, can carry out this test and get the opportunity to show the concrete benefits for both consumers and companies with 5G and IoT, such as stability, fast response rate, and higher speeds. With Doora, we really show what we can do with 5G, both now and in the future, says Stefan Trampus, Stefan Trampus, Executive Vice President, Tele2 B2B and IoT
- foodora is a pioneer in many areas and we are a fast-moving tech company that wants to lead the change forward. It feels exciting to work with the forward-looking company Tele2 to create an innovative solution for third-generation digital commerce. foodora's vision is that several hundred Dooras will roll in Sweden in the near future, says John Denbratt, Chief Logistics Manager, foodora Sweden.

Facts about the test

The Q-commerce droid Doora will be tested around Stureplan today and tomorrow and can transport both food and other products weighing up to 20 kg. The plan is that the pilot together with two players will continue in the spring.

Facts about Doora

Speed: 6 km / h
Connection: 5G
Battery life: 8h

The logo for Tele2, featuring the word "TELE2" in a bold, black, sans-serif font. The "2" is significantly larger and more prominent than the other characters.

About foodora

foodora is the largest q-commerce company in the Nordic. A market place that has thousands of affiliated restaurants and shops. The owner of foodora is Delivery Hero, which operates in 50 different markets around the world.

About Q-commerce

Q-commerce (Quick Commerce) is third-generation digital commerce. Launched by foodora in May 2020, Q-commerce means customers can, in addition to restaurant food, also have beauty products, books, and technology delivered to their home in q-speed, within 30 minutes.

Tele2's vision is to be *the smartest telco in the world, creating a society of unlimited possibilities*. Ever since Tele2 was founded in 1993, we have continued to challenge prevailing norms and dusty monopolies. Today, our award winning networks enable mobile and fixed connectivity, telephony, data network services, TV, streaming and global IoT solutions for millions of customers. We drive growth through customer satisfaction and smart combined offerings. Tele2 has been listed on Nasdaq Stockholm since 1996. In 2020, Tele2 generated revenue of SEK 27 billion and reported an underlying EBITDAaL of SEK 9 billion. For latest news and definitions of measures, please see our homepage www.tele2.com.
