PRESS RELEASE

Tele2 and OKQ8 conclude Nordic agreement on secure and sustainable network services

Stockholm – Tele2 AB (“Tele2”) (Nasdaq Stockholm: TEL2 A and TEL2 B) has won an extensive Nordic-wide procurement deal to provide network services for the fuel company OKQ8, with a focus on climate-smart total solutions. As part of the deal, Tele2 will establish one of the largest networks using SD-WAN technology in northern Europe.

Through the new agreement, Tele2 will supply OKQ8 with several innovative services within a ‘network as a service’ framework. Tele2 will offer this service for the life-cycle management and recycling of electronic waste to give OKQ8 a fully circular process that contributes to its own sustainability efforts.

- OKQ8 has the same ambitious approach as Tele2 to innovation and sustainability and we look forward to a long and rewarding partnership. With our innovative technology, we want to help OKQ8 to contribute to the transition to a smarter and more sustainable world, says Sofia Ahlmark Hyvärinen, Sales Director B2B, Tele2.

The agreement with OKQ8 will include connection over fibre and 5G. The services will be delivered to approximately 600 service stations, depots and offices in Sweden and 300 in Denmark. As part of the deal, Tele2 will establish one of the largest networks using SD-WAN technology in northern Europe.

- We place great value in working together with our suppliers for increased sustainability, and Tele2’s ambitious climate goals were an important factor for us in choosing a collaboration partner, says Filippa Jennersjö, CIO/CDO, OKQ8.
