

# Tele2 Launches VoLTE Globally for IoT Customers

**Stockholm – Tele2 AB (“Tele2”) (Nasdaq Stockholm: TEL2 A and TEL2 B) Tele2 IoT launches international rollout of Voice over LTE (VoLTE) services, which will provide the technology required by our customers to operate voice calls in the 4G network globally.**

As 2G and 3G are sunsetting across the globe, and everything connected to these old networks stops working, it is important to provide options for IoT customers using traditional voice services. The rollout of VoLTE in Tele2’s Swedish network, as well as in selected networks across the globe, will enable Tele2 IoT customers to use next-generation technology to cater to their voice call needs.

The use of VoLTE will enhance coverage across the globe by seamlessly leveraging efficient future-proof network technology. The launch of VoLTE is also a significant milestone in Tele2’s sustainability efforts, as it will enable IoT-customers to move to the new generation of more energy efficient devices.

“Voice services play an important role in IoT deployments, particularly those having mission-critical applications. Enabling VoLTE for IoT customers marks a significant milestone in our ability to serve our customers’ needs. This launch reflects Tele2’s commitment to excellence and is in line with our vision to enable a society of unlimited possibilities.” says Cyril Deschanel, Managing Director of IoT at Tele2.

VoLTE (Voice over LTE) is a powerful alternative to the current 2G/3G voice service, delivering superior voice clarity, faster data speeds, and extended battery life for IoT devices. With the full launch of VoLTE now complete, this means Tele2 IoT can globally support VoLTE on any SIM provided by Tele2.

Most operators are already in the process of shutting down 3G, with 2G closure not far behind. For Tele2, in Sweden 2G/3G will be fully sunsetted by December 2025, which means it is crucial that devices are ready in good time. Mission-critical applications in healthcare, for example, are particularly dependent on a high-quality voice function.

**About Tele2**

Tele2 is a leading telco with the purpose to enable a society of unlimited possibilities. Through our networks and services — ranging from mobile and fixed connectivity, telephony and data network services to TV, streaming and global IoT solutions — we are deeply connected to every aspect of today’s digital lifestyle. By making our infrastructure more powerful, reliable and sustainable, we enable society to become that as well. Tele2 was founded in 1993 and is listed on Nasdaq Stockholm. In 2023, Tele2 generated revenue of SEK 29 billion and reported an underlying EBITDAaL of SEK 10 billion.
