

International Voice

Terminate your international retail
Voice traffic via Tele2 gateway
at premium quality and attractive price.

Tele2's main focus in everything we do is quality. The quality of International Voice can never be compromised, especially if you are a mobile operator. Therefore, our international voice solution offers the premium quality routes aimed for mobile operators and their customers. We offer termination to world destinations A-Z.

All Tele2 operations and our external clients use the same solution for international voice termination and are able to offer very competitive prices towards the end customers.

Tele2 solution contains both Fixed and Mobile termination. Beside competitive prices and premium quality we offer top tier service support and latest technologies.

In addition, Tele2 provides its clients with business intelligence allowing for you to follow up on your traffic, traffic patterns and financial analysis. You will have access to reporting on a daily, weekly and monthly basis. Tele2 will administer relation towards the termination party regarding all aspects of traffic handling – quality, fraud, financial disputes etc.

You will be able quickly implement direct IP interconnects to our network which is highly efficient, and provides high-quality worldwide call termination. We can assist you with operational expertise, proprietary call routing and real-time IP quality

Our voice products are accessible via IP interconnects, and we guarantee CLI, roaming, fax, ISDN data and all other voice related services.

We at Tele2 enjoy the challenges of a dynamic and competitive market and welcome the opportunity to cooperate with customers to solve their most urgent demands for international voice.
