As a result, the Board has established a written work plan, “Work and delegation procedures for the Board of Directors of Tele2 AB”, that clarifies its responsibilities and regulates the Board’s and its committees’ internal distribution of work. Furthermore, the Board has appointed an Audit Committee with a written charter, the primary task of which is to ensure that established principles for financial reporting and internal controls are adhered to and that appropriate relations are maintained with the company’s auditors. Results of internal and external audits, which are reported to the Audit Committee, as well as management’s reporting on risks and incidents forms the basis for the Board’s evaluation of the internal controls.

**Local management – 1st line of defence**

The responsibility for maintaining a sound control environment and on-going work on internal controls has been assigned to the President and CEO and documented in the “Instructions to the Managing Director of Tele2 AB”. The President and CEO has, in turn, allocated responsibility for maintaining effective internal controls in the different countries to the respective line managers. Country CEOs are therefore responsible for ensuring internal controls over all COSO related objectives pertaining to their respective markets, with their local finance organisations having the specific responsibilities for ensuring correct and timely financial reporting.

**Central Functions – 2nd line of defence**

A number of corporate functions are responsible for promoting effective internal controls in separately defined areas. This is done by issuing group wide policies (including the group wide Code of Conduct), procedures, Financial Manuals etc. and following up on related issues. Among these functions, the central finance organisation (including Group Financial Reporting, Group Planning & Business Control, Group Tax, Group Treasury and Investor Relations) play particularly important roles in ensuring correct and timely financial reporting. Other central departments vital to maintaining a sound control environment are for example Group Legal, Group Security, Group Purchasing, Corporate Responsibility and Human Resources, as well as various controlling functions integrated in the central functions.

**Group Internal Control – 3rd line of defence**

Independently of area of responsibility, be it geographic or corporate, Group Internal Control (Tele2’s internal audit department) is responsible for evaluating the operations of the company to identify any shortcomings in internal controls over financial reporting as well as in other areas. Significant findings are reported to the Board of Directors through the Audit Committee.

*The Tele2 Code of Conduct*

Another key aspect of the control environment is the Executive Management’s enforcement of the Tele2 Code of Conduct and, as part of this, the four-eyes principle, which means that important decisions and contracts signed on behalf of Tele2 should always be made by at least two persons. The Code of Conduct is signed by all employees upon joining Tele2 and then reconfirmed annually.

When entering into a contractual arrangement with Tele2, suppliers and other business partners also need to give their assurance regarding compliance with Tele2’s standards by signing Tele2’s Business Partner Code of Conduct.

The Code of Conduct is available on the company’s intranet and on Tele2’s corporate website www.tele2.com.
Risk assessment

First and second “line of defence” is inherently responsible for the risk identification and risk mitigation related to their respective market or corporate area for financial reporting and other operational processes. On top of this Group Internal Control performs an independent risk assessment for each market and function (including financial reporting) which forms the basis for the annual internal audit plan. This risk assessment considers the fact that there is risk both from how we operate and from where we operate, as illustrated in the Risk Universe below. Other inputs to this risk assessment and the internal audit plan include results of prior audits, known incidents and reporting issues, external risk benchmarks and external assessments of countries’ general corruption levels etc. The internal audit plan is reviewed and approved by the Board through the Audit Committee.

Tele2 Group Strategic Risks

Risks which could threaten Tele2’s ability to achieve its strategic objectives are assessed by the Leadership Team (LT). These risks could relate to our strategic initiatives, financial targets or the overall vision & mission, but they could also relate to other risks in the Risk Universe considered to have a potential material effect on the group’s strategic objectives.

The strategic risks are initially defined on a high level as risk areas (as illustrated in the Risk Radar to the right on this page). Each of these risk areas are then assigned to a risk owner (an individual LT member) who is responsible for breaking down the risk into quantifiable risk scenarios, for which potential impact and likelihood is then calculated. The risk owners are also responsible for identifying actions to mitigate the risks where possible and to monitor and report any development to the rest of the LT.

The strategic risks are also reported and discussed quarterly by the Audit Committee and/or the full Board of Directors. During 2016 the Audit Committee has also had separate sections in their meetings dedicated to certain risks identified (including spectrum availability and auctions, external relationships) in order to get a better understanding of the risks and related actions. During 2016 the full Board also had dedicated sessions relating to acquisition of TDC Sverige AB.

Tele2 – Corporate Governance Report 2016 10 (13)
Information and communication
Corporate policies and procedures are available for employees on the company’s intranet or directly through the relevant central function. Manuals and guidelines of significance to financial reporting are regularly updated and continuously communicated to the employees concerned.

Monthly closings follow a pre-defined process and are preceded by monthly telephone meetings with all senior finance managers. Feedback is also provided to the reporting subsidiaries regarding their financial reporting processes.

The company management reports regularly to the Audit Committee and the Board according to established procedures.

IT General Controls
Controls such as IT and access security, change management and monitoring of systems performance and interfaces for IT systems supporting the financial reporting are of high importance for the internal controls over financial reporting. Tele2 has requirements in these areas articulated in a number of different policies and standards and compliance to these are followed up continuously.

Control activities
The line managements in the markets and Shared Operations bear the responsibility for the implementation of control activities in compliance with central policies and governance documents (including the Financial Manual), as well as for managing any further risks that they may identify. This include controls in the financial reporting processes as well as controls in other processes which could be expected to impact financial reporting. These controls comprise a mix of detailed controls at transaction level and analyses based on aggregated data.

In conjunction with monthly consolidation and reporting to management, Group Financial Reporting also performs a review of the figures reported. Furthermore, the company applies a self-certification process in relation to the annual accounts, whereby the CEOs and financial managers of subsidiaries certify that they have not withheld information of importance in the financial statements and have complied with applicable legislation, accounting policies and Tele2’s internal guidelines.

The Audit Committee reviews every interim and annual report prior to publication. The company’s financial reporting procedures are also evaluated regularly.

Particular controls have been defined within the IT organisation to ensure a favourable IT environment and minimise the risk of erroneous data. Those include controls for change management of applications and systems to ensure that no changes are implemented in the operating environment without being subjected to prior testing and approval.

Monitoring
Monitoring means ensuring that the control activities described and referred to in the previous section are appropriate and performed as intended. This follow-up is performed at various levels within the company.

Follow-up within line organisation in the markets and Shared Operations
The line managers in the markets and Shared Operations follow up on controls in their respective areas with the help of their own staff and own central functions. The follow up in the markets also extends to reviewing services performed by Shared Operations as assistance to the markets for carrying out their responsibilities.

Follow-up assisted by Group functions
In addition to the follow-up performed by line organisations in the markets, the Group functions are responsible for follow-up in their respective areas, including compliance with the company’s policies and governance documents. Where needed, this is performed through reviews with the help of experts in the respective areas (for example, the Group Security organisation identifies risk of fraud and the Group procurement organisation together with the Group Legal department follows up on the application of Tele2’s Code of Conduct for business partners. Also, matters related to financial reporting and instructions in the Financial Manual are clarified through regular interactions between finance teams of countries and Group Financial Reporting).

Follow-up assisted by Group Internal Control
Independently of line responsibilities and without any limitation by area of responsibility, Group Internal Control follows up compliance with Tele2’s rules and control activities through the performance of internal audits and other activities. The internal audits naturally also take into account the risk of errors in the financial reporting and are intended to ensure compliance with the Financial Manual, particularly when reviewing the account-closing process.

Significant risks and issues noted by Group Internal Control are communicated to both the Audit Committee and to the relevant corporate functions for the purpose of not only correcting errors, but also enhancing or clarifying policies and other governance documents, and thereby reducing the risk of future errors. During 2016, around 650 man days of internal audit were performed.
Auditor’s report on the Corporate Governance Report

To the Annual General Meeting of the shareholders of Tele2 AB (publ), corporate registration number 556410-8917. The Board of Directors is responsible for the Corporate Governance Report for the year 2016 and for ensuring that it has been prepared in accordance with the Swedish Annual Accounts Act.

Our examination has been conducted in accordance with FAR’s auditing standard RevU 16 The auditor’s examination of the corporate governance statement. This means that our examination of the corporate governance report is different and substantially less in scope than an audit conducted in accordance with international Standards on Auditing and generally accepted auditing standards in Sweden. We believe that the examination has provided us with sufficient basis for our opinions.

In our opinion, the Corporate Governance Report has been prepared and its disclosures in accordance with chapter 6 section 6 the second paragraph points 2-6 the Annual Accounts Act and chapter 7 section 31 the second paragraph the same law are consistent with the annual accounts and the consolidated accounts and are in accordance with the Annual Accounts Act.
