CEO word, Q3 2016

The third quarter has shown a strong underlying financial performance. Profitability in the quarter has been positively impacted by strong mobile end-user service revenue as a result of our relentless focus on data monetization, seasonality and to a certain extent, lower than usual marketing spend, which will be caught up later in the year. As Value Champions we have been well positioned to capture the big appetite for data during the summer despite the new roaming regulation. Sweden has continued to leverage on the dual brand strategy and has delivered a record mobile end-user service revenue. The Baltics have continued to grow mobile end-user service revenue with sustained margins. In the Netherlands, our Fun Rebel positioning and continued focus on attracting high value customers have resulted in a double digit growth of mobile end-user service revenue, whilst our fixed business has continued to decline despite increased investments.

Group mobile end-user service revenue, on a like for like basis, increased by 6 percent year on year. Our business excluding Netherlands delivered strong EBITDA development, which has offset the Dutch mobile investments this quarter.

The Swedish business has seen an increasing demand for data, both home and abroad, which has stimulated net intake and sales of bigger buckets. Consumer mobile postpaid grew 7 percent, driven by Comviq market share development and Tele2 residential ASPU progress with B2B Large Enterprise showing continued momentum. EBITDA in the quarter was seasonally strong and increased thanks to our relentless focus on data monetization, positive impact from a strong roaming summer and realized efficiencies from Challenger initiatives. During the quarter, we have made progress on a number of fronts to enhance our Value Champion position. Specifically, we have increased our geographical 2G and 4G coverage to 88 percent and are well on track to reach our 90 percent target by the end of this year, ensuring that our customers have an excellent network quality experience wherever they are. In October we launched our new Tele2 branding campaign with the slogan “Be content with more”, with a more attractive offering on our largest bucket and additional data SIMs for carefree surfing on all of your devices.

The Baltic region has delivered a strong financial performance and mobile end-user service revenue growth of 7 percent. The increased smartphone penetration and our 4G coverage which is now at 99 percent continues to drive data consumption and steer customers towards higher value tariffs. During the quarter we expanded our partnership with MTG by launching the video streaming service Viaplay, thus increasing the demand for data further. EBITDA margin remained stable for the region at 32 percent, partly impacted by the new roaming regulation.

In the Netherlands, mobile momentum continues with solid net intake, and increasing sales of larger buckets fuelled by our excellent brand positioning and our competitive offerings resulting in double digit mobile end-user service revenue growth. EBITDA was as expected impacted by continued investments in our mobile business, however to some extent, offset by lower levels of marketing spend during the summer. We continued to build up our Fun Rebel brand platform with an innovative off- and online roaming campaign with considerable viral spread. During the quarter customer satisfaction and data usage on our own network significantly improved and we have now reached outdoor population coverage of above 98 percent and indoor coverage of around 83 percent. We continued to successfully roll out VoLTE on a larger scale and have now opened our 13th retail store, contributing to an increasing share of direct sales and valuable brand presence.

“I am pleased with the underlying momentum and progress made in the quarter with excellent mobile contribution in all our major markets”

Integration of the JV in Kazakhstan has progressed well in the quarter. Mobile end-user service revenue grew strongly by 20 percent, like for like, as a result of an increased customer base. Removal of unlimited plans and new pricing in the previous quarter has however resulted in some decline in customer net intake. EBITDA contribution was strong and increased by over 200 percent on a like for like basis, due to improved operating leverage and synergies from the JV integration. The Challenger program is delivering in line with expectations towards the target of SEK 1bn by 2018. To date, we have achieved a run rate of SEK 415 million in savings across the Group mainly coming from customer service, relocation of resources to India and our consolidation and transformation of Network & IT into Shared Operations. The savings are however offset by investments, mainly within Network and Marketing and Sales, in the Netherlands and in Kazakhstan, as well as declining revenues within our fixed business.

As part of our annual financial review cycle, we assess the future cash generation of our various business units. As a result of this analysis, we have recognized an impairment of SEK 2.5bn related to our business in the Netherlands, resulting in a net loss for the Group.

Looking forward into the fourth quarter, I am delighted that we have received clearance on our acquisition of TDC by the European Commission which will allow us to work towards closing by end of October. In conjunction with our announcement of the TDC acquisition we also communicated our intention to raise equity through a Rights Issue of approximately SEK 3bn, which will be subject to approval at an Extraordinary General Meeting to be held later this month.

To conclude, I am pleased with the underlying momentum and progress made in the quarter with excellent mobile contribution in all our major markets. Our Value Champion strategy, combined with a relentless focus on offering the best wireless technologies with a challenger cost structure, will lead us to sustainable value creation for our customers, employees and our shareholders.

Allison Kirkby,
President and CEO

Financial guidance

Tele2 AB gives the following guidance for 2016 for continuing operations (excluding the TDC acquisition) in constant currency which is unchanged from previous quarter:

- Mobile end-user service revenue growth of mid-single digits
- Net sales of between SEK 26 and 27 billion
- EBITDA of between SEK 4.6 and 5.0 billion
- CAPEX level of between SEK 3.7 and 4.1 billion

The Challenger Program

A group-wide program focused on increasing productivity was launched at the end of 2014. The program will build over 3 years and is expected to reap full benefits of SEK 1 billion per annum starting in 2018. The investment required will be SEK 1 billion, phased over 3 years. All program investments are, and will be, reported as one-off items, affecting EBIT. For more details, see Note 3.

Dividend Policy for Fiscal year 2016 to be paid in May 2017

The Company remains committed to its 3 year progressive dividend policy which, as usual, is subject to shareholder approval at its AGM.

For clarification, Tele2 intends to deliver an absolute dividend pay-out which is 10 percent higher than the prior year dividend of SEK 2,389 million. This reflects the timing of the Rights Issue as occurring at the very end of 2016.

Financial year 2016 marks the final year of the current 3-year progressive dividend policy and we will update guidance on future dividend policy as customary at our Q4 results announcement in January 2017.

Authorization to pay extraordinary dividends will be sought when the company has excess capital.

Pursuant to the approval received at the 2016 AGM, Tele2 has the authorization to repurchase up to 10 percent of its share capital.

Balance sheet

Tele2 believes the financial leverage should reflect the status of its operations, future strategic opportunities and obligations. It should also be in line with both the industry and the markets in which it operates. This would imply a target economic net debt to EBITDA ratio of 1.5-2.0x over the medium term. As communicated, Tele2 will be above this range during the period of investments in the Netherlands.

One-off items in segment reporting

One-off items comprise impairment losses and transactions from strategic decisions, such as capital gains and losses from sales of operations, acquisition costs, integration costs due to acquisition or merger, restructuring programs from reorganizations (i.e. Challenger program, costs for phasing out operations and personnel redundancy costs), as well as other items with the character of not being part of normal daily operations and that affects comparability.

Impairment of goodwill

In Q3 2016, an impairment loss on goodwill of SEK 2,456 million was recognized in cost of service provided referring to the cash generating unit Netherlands. The impairment loss was based on the estimated value in use of SEK 9.0 billion. The impairment was recognized as a result of a reassessment of future cash flow generation in the Netherlands.

In Q1 2016, an impairment loss on goodwill of SEK 326 million was recognized referring to the cash generating unit Kazakhstan. The impairment was due to the macro environment, including the Tenge devaluation which implied weaker consumer purchase power and higher expenses. In addition, intense competitive pressure during Q1 eroded pricing power for all market participants. This also resulted during Q1 2016, in a decrease in the value of the put option obligation to the former non-controlling interest in Tele2 Kazakhstan, which represents an 18 percent economic interest in the new jointly owned company (see Note 11), with a positive effect in the income statement of SEK 413 million reported under financial items (Note 5).

In Q3 2015, an impairment loss on goodwill of SEK 197 million was recognized referring to the cash generating unit Estonia. The impairment loss was based on the estimated value in use of SEK 1.2 billion by using a pre-tax discount rate (WACC) of 9 percent. The impairment was recognized as a result of the underlying performance of the Estonian economy and Tele2's operation.

Acquisition costs

In Q2 and Q3 2016, EBIT (administrative expenses) was negatively impacted by SEK 6 and 3 million respectively concerning expenses related to the ongoing acquisition of TDC Sweden for which closing is expected in Q4 2016. For additional information please refer to Note 11.

In Q1 and Q2 2016 as well as Q4 2015, EBIT (administrative expenses) was negatively impacted by SEK 3, 9 and 118 million respectively concerning expenses related to the combination of the Tele2 and Kazakhtelecom mobile operations in Kazakhstan. For further information please refer to Note 11.

Integration costs

As a result of the acquisition of Altel and the ongoing merger with Tele2's present operations in Kazakhstan, integration costs are reported as one-off items and in the income statement on the following line items.

Other one-off items

In Q3 2015, other operating revenues in Sweden were positively affected by SEK 112 million, concerning transactions related to sales of 2G sites to Net4Mobility, an infrastructure joint operation between Tele2 Sweden and Telenor Sweden, and the result of dismantling 2G sites. The mission for Net4Mobility is to build and operate a combined 2G and 4G network. From its establishment Tele2 and Telenor have transferred sites to the joint operation. These site transfers have now been completed resulting in a positive impact on Tele2's financial statement. Tele2 and Telenor are technically MVNO's with Net4Mobility and hence act as capacity purchasers.

In Q3 2015, other operating expenses were negatively affected by SEK 6 million, related to the devaluation in Kazakhstan. The total foreign exchange rate effect of assets and liabilities in Kazakhstan was reported in other comprehensive income and amounted at the time for the devaluation to SEK -416 million. Please refer to Note 5 regarding effects on change in fair value of put option Kazakhstan.

On September 30, 2016 the reported debt amounted to SEK 22 (247) million and the nominal value to SEK 300 (287) million. The change in book value was reported in equity, please refer to Note 10.

The facility has a tenor of five years with two one-year extension options and it replaced the previous revolving credit facility dated May 2012. The new facility further strengthens Tele2's financial position and secures a structure of diversified funding sources. The new facility was unutilized as of September 30, 2016.

Transfer of right of payment of receivables

In Q1 2016 and onwards, Tele2 has started to transfer the right for payment of certain operating receivables to financial institutions. The obligation that occur when receiving payment from financial institutions connected to the transfer of right of payment of receivables for sold equipment has been netted against the receivables in the balance sheet and resulted in a positive effect on cash flow. During 2016 the right of payment of SEK 1,105 million has been transferred, of which SEK 361 million in Q3 2016.

Classification and fair values

Tele2's financial assets consist mainly of receivables from end customers, other operators and resellers as well as cash and cash equivalents. Tele2's financial liabilities consist mainly of loans, bonds and accounts payables. Classification of financial assets and liabilities including their fair value is presented below. During 2016, no transfers were made between the different levels in the fair value hierarchy and no significant changes were made to valuation techniques, inputs used or assumptions except for the valuation of the put option related to Tele2 Kazakhstan according to below.

In Q3 2016, a liability was reported for contingent deferred consideration to the former owners of Kombridge, Sweden, please refer to Note 11. The estimated fair value of the deferred consideration amounted on September 30, 2016 to SEK 26 (-) million. The fair value was calculated based on expected future cash flows at which a maximum turnout has been assumed.

In Q1 2016, an initial purchase price of SEK 125 million was paid to the former non-controlling shareholder Asianet in Tele2 Kazakhstan for its 49 percent stake. According to the agreement between the parties Asianet has right to 18 percent of the economic interest in the new jointly owned company, please refer to Note 11. The estimated fair value of the deferred consideration amounted on September 30, 2016 to SEK – (541) million. The fair value was calculated based on expected future cash flows of the jointly owned company, please refer to Note 5.

NOTE 5 OTHER FINANCIAL ITEMS

Other financial items in the income statement consist of the following items.

| SEK million | 2016 Jan 1– Sep 30 | 2015 Jan 1– Sep 30 | 2015 Full year | 2016 Q3 | 2015 Q3 |
|--|--------------------|--------------------|----------------|-----------|------------|

| Other financial expenses | –9 | –5 | –5 | –4 | –2 |
| Total other financial items | 411 | –24 | –59 | –5 | –53 |

In Q1 2016, part of the put option obligation to the former non-controlling interest in Tele2 Kazakhstan was settled and SEK 125 million was paid to the previous non-controlling interest. The remaining part of the fair value of the put option obligation was in Q1 2016 changed to zero, affecting financial items in the income statement positively by SEK 413 million. The fair value is calculated based on expected future cash flows of the jointly owned company. The reason for the change in fair value in Q1 2016 was due to the macro environment, including the Tenge devaluation which implied weaker consumer purchase power and higher expenses. In addition, intense competitive pressure during Q1 eroded pricing power for all market participants. The fair value estimate is sensitive to changes in key assumptions supporting the expected future cash flows for the jointly owned company in Kazakhstan. A positive deviation from the current assumptions would increase the earn-out liability.

In Q3 2015, the fair value of the put option of the business in Kazakhstan decreased by SEK 245 million affecting financial items in the income statement negatively by SEK 30 million and other comprehensive income positively by SEK 275 million mainly due to the devaluation of the Kazakhstan currency during the quarter. For further information please refer to Note 4.

In Q1 and Q3 2015, the cash flow was negatively affected by SEK 130 and 76 million respectively related to currency derivatives designated for hedge accounting.

NOTE 6 TAXES

During the first nine months 2016, the underlying effective tax rate temporarily increased to 32 (21) percent. The reason for the increase is mainly driven by the non-deductible impairment of goodwill in the Netherlands.

| Adjusted tax expense and effective tax rate | 410 | 32.0% | -378 | 21.2% | -428 | 21.3% |

Other non-deductible expenses/non-taxable revenues of SEK -40 (-181) million mainly relate to interest costs in Sweden. Tele2 claims these interest costs are deductible, but due to the uncertainty in how the tax legislation should be interpreted the interest costs have in the accounting been reported as non-deductible expenses until the tax rules have been further clarified by the courts, which may take several years.

In Q3 2016, net taxes were negatively impacted by SEK -140 million due to revaluation of deferred tax assets in Luxembourg as a consequence of reduced tax rates.

In Q1 2016, net taxes were positively affected by a valuation of deferred tax assets in Germany of SEK 40 million.

NOTE 7 RELATED PARTIES

Tele2's share of cash and cash equivalents in joint operations, for which Tele2 has limited disposal rights was included in the Group's cash and cash equivalents and amounted at each closing date to the sums stated below.

Other related parties are presented in Note 37 of the Annual Report 2015.

In Q1 2016, CAPEX for Lithuania was affected by SEK 123 million related to licenses in the 900 and 1800 MHz bands. The new licenses will ensure continued operations after 2017 when the current licenses expire. They will also contribute to higher quality and lower costs, due to the quality and price ratio that Tele2 has opted for. SEK 26 million was paid during Q1 2016 and the remaining part will be paid over 15 years of the license lifespan.

NOTE 9 CONTINGENT LIABILITIES AND ASSETS

| Asset dismantling obligation | 147 | 137 |
| KPN dispute, Netherlands | 223 | 212 |

Contingent assets

In May 2016, the Stockholm District Court ordered Telia to pay damages to Tele2 concerning Telia's abuse of its dominant position on wholesale ADSL-services. The judgement has been appealed by both parties. Due to the uncertainty in the final outcome Tele2 has not recognized any benefits from the judgement.

Contingent liabilities

Tele2 has obligations to dismantle assets and restore premises within fixed telephony and fixed broadband in the Netherlands as well as in Austria. Tele2 assesses such dismantling as unlikely and consequently only reported this obligation as contingent liabilities.

Tele2 Netherlands is, in the ordinary course of its business, involved in several regulatory complaints and disputes pending with the appropriate governmental authorities. In a specific case regarding the rental fees of copper lines, which Tele2 Netherlands uses as part of its fixed operations, the regulator (ACM) has determined that the rental fees are to be adjusted with retroactive effect from 2009. On July 21, 2015 the Supreme Administrative Court (CBB) ruled that ACM had no powers to impose any deduction on the WPC IIA price caps from 2009 till now. This resulted in an additional claim from KPN of EUR 14.5 million for the first 3 years (2009–2011), which were previously deducted by ACM in their ruling. Together with the claim for the period 2012–July 2014 this has resulted in a total claim from KPN for the time period 2009–July 2014 amounting to EUR 23.2 million (SEK 223 million) which is subject to pending appeals and court cases expected to go on for several years. Our assessment is that it is unlikely that Tele2 will have to pay these fees and consequently no provision has been made.

The tax authorities in Russia are currently performing tax audits on several of Tele2's former subsidiaries in Russia. Per the sales agreement with the VTB-Group Tele2 is liable for any additional taxes payable relating to periods under Tele2's ownership as result of the tax audits. On September 30, 2016 (and December 31, 2015 respectively) Tele2 has won tax disputes equivalent to SEK 143 (187) million, of which the Russian tax authorities has appealed SEK 1 (154) million. In addition, Tele2 has lost tax disputes of SEK -114 (-16) million, of which Tele2 has appealed SEK 94 (-) million. Due to a change in the assessments of certain tax disputes in Q3

2016 an additional provision of SEK 93 million was recognized in discontinued operations. Total provisions as of September 30, 2016 (and December 31, 2015 respectively) amounted to SEK 114 (16) million. Even though it cannot be ruled out that Tele2 may be liable to certain costs and that new cases can be identified, Tele2 assesses that it is not likely that any additional taxes need to be paid and consequently no additional provisions have been made.

Additional information about contractual commitments is provided in Note 29 in the Annual Report 2015.

LTI 2016

During the Annual General Meeting held on May 24, 2016, the shareholders approved a retention and performance-based incentive program (LTI 2016) for senior executives and other key employees in the Tele2 Group. The measurement period for certain retention and performance-based conditions for LTI 2016 is April 1, 2016 – March 31, 2019. The program has the same structure as last year's incentive program.

Total costs before tax for outstanding rights in the incentive program are expensed over the three-year vesting period, and these costs were initially expected to amount to SEK 60 million, of which social security costs amount to SEK 18 million.

To ensure the delivery of Class B shares under the program, the Annual General Meeting decided to authorise the Board of Directors to resolve on a directed issue of a maximum of 1,820,000 Class C shares and subsequently to repurchase the Class C shares. The Board of Directors has not yet used its mandate.

LTI 2013

The exercise of the share rights in LTI 2013 was conditional upon the fulfilment of certain retention and performance based conditions, measured from April 1, 2013 until March 31, 2016. The outcome of these performance conditions was in accordance with below and the outstanding share rights of 345,025 have been exchanged for shares in Tele2 and 19,380 share rights for cash during Q2 2016. Weighted average share price for share rights in LTI 2013 at date of exercise amounted to SEK 75.74 during 2016.

ACQUISITIONS

Kombridge, Sweden

On August 22, 2016 Tele2 acquired 100 percent in the Sweden based company Kombridge AB. Since 2010, Kombridge has offered security services, connected device management and application management for Internet of Things (IoT) applications and services.

Kombridge brings a number of valuable assets and Tele2 IoT will immediately strengthen its security portfolio through the Kombridge Connect security product. The combined sales and technology teams will build upon Kombridge's technology and knowledge to establish even stronger value added services for B2B application- and connectivity management.

The goodwill of SEK 26 million consists of value Tele2 gets by adding the expertise, the product and the platform from Kombridge and integrate in Tele2's business.

TDC, Sweden

On June 21, 2016 Tele2 announced that Tele2 has signed a contract to acquire 100 percent of TDC Sweden for SEK 2.9 billion on a debt free basis. The transaction was approved by regulatory authorities on October 7, 2016 and the transaction is expected to be closed in Q4 2016.

TDC Sweden is a provider of B2B services in Sweden, serving both the public sector and many Swedish blue chip customers with their entire end-to-end connectivity and communication needs. TDC Sweden has a strong position in attractive product segments, and a solid track record of profitable growth, delivering net sales in 2015 of SEK 3.4 billion and an EBITDA of SEK 0.4 billion. The operations had 809 full time employees at the end of 2015.

Tele2 estimates annualized run rate OPEX and CAPEX synergies to amount to approximately SEK 300 million, with additional one-off CAPEX synergies estimated to amount to SEK 200 million. Positive effects of cross-selling are also expected. Preliminary estimates for the integration costs and other one-off costs required to achieve synergies amount to approximately SEK 750 million. Total acquisition costs of SEK –9 million have been reported as operating costs in the income statement.

In conjunction with the announcement of the acquisition, Tele2 proposed to undertake an equity issue with preferential rights to existing shareholders to a total amount of approximately SEK 3 billion. The issue is subject to the approval of an Extraordinary General Meeting. The completion of the acquisition is not conditional on equity financing, as Tele2 has available funds and existing credit facilities in place to finance the acquisition. The issue is proposed in order to maintain Tele2's financial strength, is fully underwritten

and has the support of Tele2's largest shareholder Kinnevik. The issue is expected to be completed in Q4 2016.

Combination of operations, Kazakhstan

On November 4, 2015 Tele2 announced the agreement with Kazakhtelecom to combine the two businesses' mobile operations in Kazakhstan, Tele2 Kazakhstan and Altel, in a jointly owned company. Necessary regulatory approvals for the transactions were received end of January 2016 and the transaction was completed on February 29, 2016.

Kazakhtelecom has subscribed for newly issued shares in the Dutch holding company Khan Tengri Holding B.V. (previously 100 percent owned by Tele2 after the buyout of Asianet), being the owner of Tele2 Kazakhstan, in exchange for 100 percent of the shares in Altel. The estimated fair value of identifiable net assets in Altel was SEK 840 million.

The business combination will strengthen the position of both companies in the Kazakhstan market by combining Tele2's existing operations in Kazakhstan with Kazakhtelecom's mobile business, Altel. The new business has more than 6 million customers and a market share of around 23 percent. The business combination with Kazakhtelecom's mobile operation will create a more sustainable and significant player in the market. The process of integrating the businesses is well underway and the expected synergies will be beneficial for both our customers and shareholders.

Tele2 has a 49 percent economic ownership in the jointly owned company and 51 percent of the voting rights. Tele2 has the right to appoint the CEO and all other management roles except for the CFO. Tele2 has concluded that Tele2 has the control over the jointly owned company as defined by IFRS and consequently the company is consolidated by Tele2. After three years Tele2 will under a put option be able to sell its 49 percent stake at fair value to Kazakhtelecom, which holds a symmetrical call option.

As part of the transaction Tele2 acquired Asianet's 49 percent stake in Tele2 Kazakhstan. The purchase price amounted to an initial payment of SEK 125 million and a deferred consideration equivalent to an 18 percent economic interest in the jointly owned company during a three year period. After three years Asianet has a put option on its 18 percent earn out interest and Tele2 has a symmetrical call option. The exercise price of the put and call options will be the fair market value of the 18 percent interest in the jointly owned company, where Asianet will receive, as deferred payment, the first KZT 8.4 billion (SEK 216 million) of any equity value attributable to a 49 percent stake. Therefore, the purchase agreement with Asianet means that Tele2's effective economic interest in the jointly owned company during the first three years will be 31 percent.

The financing of the jointly owned company has been provided with existing shareholder loans from Tele2 of KZT 97 billion (SEK 2.5 billion) and a pre-existing interest free subordinated loan of KZT 11.7 billion (SEK 300 million) from Kazakhtelecom with extended maturity to 2031. Future funding needs for the jointly owned company will be provided via bank debt guaranteed by Kazakhtelecom.

The current earn-out liability to the previous non-controlling shareholder Asianet on its pre-existing 49 percent stake in Tele2 Kazakhstan was on September 30, 2016 valued at fair value determined to be nil. For further information please refer to Note 4.

Altel is providing telecommunication services, including mobile services and internet services under the trademark ALTEL 4G in Kazakhstan. The business areas consist of prepaid mobile regular and mobile broadband. Total acquisition costs of SEK –130 million have been reported as operating costs in the income statement in 2016 by SEK –12 (–118) million.
